• PROFILE

I am a **Junior Front-end Developer** specializing in **React JS**. I have experience in developing with HTML, CSS, JavaScript, and TypeScript. Additionally, I am skilled in creating tests using Jest, Vitest, and React Testing Library. My knowledge of NodeJS, ExpressJS, and SQL allows me to build more complex front-end projects with integrated databases. My focus on improving application performance and integration demonstrates my attention to detail and adaptability, enhancing my ability to solve problems as a team player.

• PERSONAL PROJECTS

Personal Portfolio

A showcase of my skills, knowledge, and projects. Developed using React with TypeScript, HTML, CSS, Context API, and Vite. Comprehensive integration testing with Vitest and React Testing Library ensures robustness and reliability. Includes contact information and personal details, providing an overview of my capabilities and achievements.

Movieflix API

An API developed as the final exercise for the backend module of the "Devquest - Dev em Dobro" course. This project utilizes Node.js, TypeScript, Express.js, and Prisma to manage movie records. The API supports CRUD operations for movies and includes functionality for filtering movies by genre. Documentation is provided via Swagger for easy interaction and understanding of the API.

Dr. Lorenza - The Foundations of a Fulfilling Life

A freelance project dedicated to Dr. Lorenza, a nutraceutical physician. Developed with React, TypeScript and Vite. The site features an integrated blog, currently in development, where Dr. Lorenza can post articles and interact with users. This project allowed me to enhance my client communication skills and develop the project autonomously. Automated tests using React Testing Library and Vitest ensure the project's reliability.

Finantial Lighthouse

A personal project developed using React, TypeScript, Redux, and Tailwind CSS. This application helps users analyze their personal finances by adding, viewing, and managing income and expenses. To help the user to understand the website functionality, it was used React-joyride.

Pokedex using PokeAPI

A project utilizing the PokeAPI to display Pokémon data. Developed with React, JavaScript, Context API, and Vite. Uses Axios for secure API requests and styled-components for enhanced UI styling. Features include data retrieval by type or name, and detailed pages showcasing Pokémon stats, abilities, and evolutions.

• E D U C A T I O N

School of Dentistry, Pontifícia Universidade Católica de Minas Gerais, Minas Gerais, Belo Horizonte
February 2014 - Dezember 2020

Gained effective communication and clear explanation skills through client interactions. Developed teamwork and pressure management abilities in clinical settings.

• S K I L L S

- **Attention to the Details:** Ensures meticulous frontend precision for seamless user experiences.
- **Adaptability:** Rapidly adapts to evolving frontend technologies to deliver cutting-edge solutions.
- **Proactive Collaboration:** Engages collaboratively for aligned project outcomes in frontend development.
